Using AJAX, the XMLHttpRequest Object API, to Dynamically Populate Web Page Data. by Fred Brack Last Updated Introduction. I maintain a website whose Home Page is updated once per week; but other pages on the site are updated several times a week. I wanted to extract a number from one of those pages dynamically to display as part of the Home Page, and that's how I got into learning about AJAX.

Using AJAX, the XMLHttpRequest Object API, to Dynamically ...
Auto-complete UI features. The AJAX table completer class has a number of UI improvements. ... A field inherits and uses the reference table's auto-complete attributes unless the field has its own value for the same attributes. You can define the attributes for references to a table, and it affects every form that references that table.
