LibGen is a unique concept in the category of eBooks, as this Russia based website is actually a search engine that helps you download books and articles related to science. It allows you to download paywalled content for free including PDF downloads for the stuff on Elsevier's Science Direct website. Even though the site continues to face legal issues due to the pirated access provided to books and articles, the site is still functional through various domains.

When you create an app in the developer portal, you'll be prompted for the app's name. This is what Alfresco will display to your users when referring to your app. Insert the app's name exactly as you intend it to appear to the user. Your app's name shouldn't include the word Alfresco or be similar to Alfresco in either sound or spelling.

For capturing content, an XML Schema needs to be created by developer. It is then rendered automatically using a user-friendly Web Form (using XForms technology embedded in Alfresco). While Alfresco has default form renderings for all types (string, date, etc), it is possible to extend Alfresco and write your own WCM Forms Widgets.
