Manual pages are normally stored in nroff(1) format under a directory such as /usr/share/man. In some installations, there may also be preformatted cat pages to improve performance. See manpath(5) for details of where these files are stored. This package supports manual pages in multiple languages, controlled by your locale.

man(1) - Linux manual page

Many people still believe that learning Linux is difficult, or that only experts can understand how a Linux system works. Though there is a lot of free documentation available, the documentation is widely scattered on the Web, and often confusing, since it is usually oriented toward experienced UNIX or Linux users. Today,

There are many distributions of Linux out there. Each of them has its own variation of commands to work with. Specifically for this tutorial, I'm going to be using Ubuntu 14.04.2 LTS on Cloud9. Keep in mind that all commands demonstrated here will probably be usable on earlier and future versions of Ubuntu, as well as Debian and Debian-based distros.

Linux Navigation Tutorial for Beginners | Pluralsight ...

There are thousands and thousands of Linux commands and it is impossible to remember all of them. The man (short for manual page) tool uses the less program to display information about a particular command. The usage is very simple; you just type man, followed by the command you want to find out more about. For example, to get more information about the ls command, you can type man ls.
