WHO | WHO Global Health Promotion Conferences

From a global health perspective, domestic and international health are inseparable; no one country can safeguard the health of its citizens in isolation from the rest of the world. In order to protect our communities at home, traveling, living, and working abroad – including armed services personnel deployed overseas – CDC works with international partners to stop public health threats at their source.

Defining Health Promotion and Disease Prevention - RHHub ...

Health promotion is the process of enabling people to increase control over, and to improve their health. Health promotion is a set of actions to foster good health and wellbeing. It is not 'promotion' as in the sense of the word usually understood. Telling people how to look after their health is just one part of health promotion.
