Neuroscience: exploring the brain - SILO.PUB

The human brain is a fantastically complex system, capable of transforming a torrent of incoming senses into thought and action. In this module, we will look at the brain from a human-centric viewpoint, exploring how the various subsystems of the brain work, enabling us to survive and thrive in a changing world. Lesson 1: Vision

Fundamentals of Neuroscience, Part 3: The Brain | edX

Reminiscing about one's past from a third-person perspective appears to require more functional connectivity between brain regions that are used to recreate mental images in the mind's eye and may...
