S U Carbs Manual

Unlike other types of carburettor, which have fixed jets , the SU has only one jet, so the mixture setting affects the engine throughout its speed range. Some SUs also have exhaust emission-control devices to comply with anti-pollution laws. Adjustment of these is described in Adjusting an emission-control carburettor. Before tuning the carburettor, carry out all the checks in Checking and ...

Adjusting an SU carburettor | How a Car Works

While specific instructions for adjusting and balancing S.U. carbs for a particular car are usually found in the appropriate workshop manual, they are not always too clear. The most basic idea to keep in mind is that the air flow and mixture are the same from one carb to the other. A basic "generic" procedure follows. 1.

To test the main jet, do a roll-on from 50-mph to 70-mph in 3rd gear. If the engine backfires or breaks up in the carb, increase the main jet size .004". If the engine is flat or will not accelerate, decrease the main jet by .004". Since 2004 S&S shorty carbs have been fitted with an adjustable main jet air bleed (#13).

- Nutrition Care Manual

Actually when the first carbs were produced is a bit of a grey area, but it's very likely they were made at George Walles & Co.'s works at 258, Euston Road, London. George Walles sold his works and premises in 1906, subsequently Carl joined up with George's son, taking temporary premises in Euston Buildings whilst new works were being built at ...
