The study of ethnic and racial boundaries is intimately connected to the constructivist view on race and ethnicity. Rather than individual ethnic or racial "groups," their history, culture, and social organization, the boundaries between such groups and the mechanisms of their production and transformation move to the foreground. This implies a shift away from concerns with the given ...

Since the end of World War II, there has been an epochal shift in the global racial order that had persisted for centuries (Winant and Seidman, 1998). The horrors of fascism and a wave of anticolonialism facilitated a rupture with biologic and eugenic concepts of race, and challenged the ideology(ies) of White supremacy on a number of important ...

...

This shift from codified and explicit racism to more subtle forms comes at a time when the very boundaries of race and ethnicity are being reshaped by immigration and a rising recognition that old systems of racial classification inadequately capture a diverse America.

The Changing Terrain of Race and Ethnicity: Krysan, Maria ...

By carefully articulating a theory of panethnicity as a process of shaping and shifting group boundaries, collecting data apposite to that theory, and designing demanding empirical tests, Okamoto expertly shows that Americans of diverse Asian backgrounds did not become panethnic overnight and ex nihilo as a passive response to state-constructed racial categories.

In the United States, economic inequality is both racialized and gendered, with Black and Latina women consistently at the bottom of the economic hierarchy. Relative to men (across racial groups) and White women, Black and Latina women often have less-desirable jobs, lower earnings, and higher poverty rates. In this essay, we draw attention to the role of the state in structuring such inequality.

What's Policy Got to Do with It? Race, Gender & Economic
